# DIVA2

The New Generation

payment-technology

LoadIt2 / v4
Tool for loading and kiosk applications

LoadIt2 is a simple program which enables loading and withdrawal with any cashless payment system via PC. Thanks to the universal reader interface (DeDesk DLL), all conventional data carrier technologies and system manufacturers are supported.

The cashless payment system is connected either via USB or serially via RS232 to a PC. All DIVA2-based readers (DeLight Desk, LeX), the DeDesk USB reader and all third-party readers via MDB / RS232 using a DIVA / DIVA2-based controller are suitable.

Benefits

- Loading/withdrawal can be carried out centrally on a PC
- All transactions (loading/withdrawal) are listed in monthly log files
- Intuitive operation
- Support of DeDesk USB reader and DIVA / DIVA2 / DeLight / DeLight Desk / MaX
- Support of MDB card readers (via MaX, etc.) and Hug-Witschi readers with direct write access to data carriers

Features

- Load configurable fixed amounts with each mouse click or load amount manually
- Withdraw (delete account balance on data carrier)
- Display and check account balance
- Support of all essential data carrier structures for LEGIC and MIFARE on the market
- One log file per month (date, time, user ID, company code, old account balance, new account balance, can be edited with Excel or DB)
- Native Windows look and feel
- Kiosk function for simple points of sale (POS)
- Reader visualisation using traffic light control

Technical data

- For Windows XP/7/8/10
- DIVA software version 6.80 and upwards
- DIVA–PC connection via RS232 cable
- Log file with date, time, user ID, company code, old account balance, new account balance
- .NET 4 required
- Integrated DeDesk DLL
- 30-day demo version available
  A licence file is supplied for registration

Additional items

- D2.02.000.40   DeLight Desk SET checkout
- HW.71.000.02   DeDesk USB
- HW.71.000.01   DeDesk USB LCD
